F3 - A tough truck for transportation in logistics centers

■ Strong structure and Li-ion heart

F3 continues the advantage of EPL153(1), a simple and strong truck frame and a plug&play Li-ion battery. These deliver tough performance when transporting goods in logistics centers based on different work shift needs.

■ Upgraded tiller head for ergonomics

F3 adopts a new tiller head for an user to operate the truck more easily using the palm of his hand, instead of controlling the knob with thumbs. The pinch force exerted on a control knob during operations can be minimized so that excessive physical stress and strain on the hands are reduced.

■ Flip cover for battery safety assurance

Its flip cover design protects the battery from water ingress, which ensures operation safety .

Why F Series ?

■ Platform-based design to maximize competitive advantage in the market

F series features the platform F, which simplifies the configuration of the truck and allows buyers to choose from 4 different chassis by application. The product design provides value and creates a flexible product strategy by introducing new equipment that meets various market requirements.

■ Cost-saving operations throughout the distribution cycle

4 units per box as standard wholesale supply reduces overall spending through the entire distribution process. F3 accommodates **176** units in a 40' shipping container compared to 108 units of EPL153(1), that can reach as high as **30-40%** of ocean freight charges reduction.
